

# AVANCER2

Double turret slitter with a separate unwinding station

High performance machines for slitting and rewinding flexible materials

- Turret rewind
- Automatic knife setting
- Precise tension control
- Various handling solutions
- High automation
- Advanced software solutions
- Controlling possibilities
- Intuitive Control Panel

**Web width** 1000/1600mm

**Unwind roll diameter** 1500mm

**Min. web width** 300mm

**Unwind roll weight** 2500kg

**Min. slit width** 50mm/25mm option

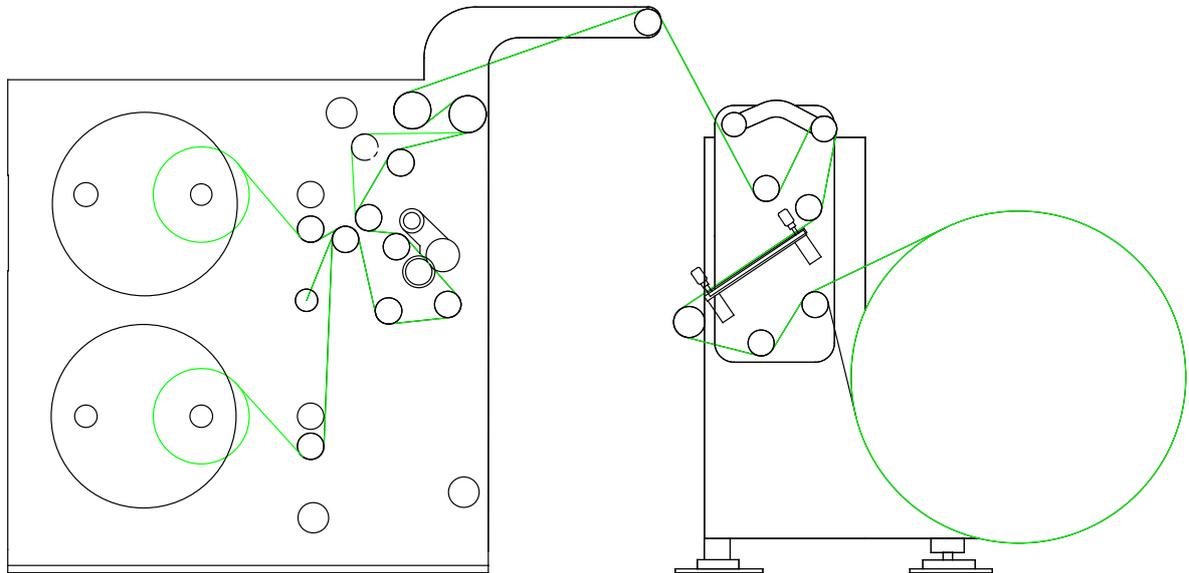

**Rewind roll diameter** 600mm

**Speed** 700m/min

**Core roll diameter** 70mm, 3", 6"

**Processed materials:** printed / unprinted foils (PE, PP, PA, PS, PET and other), paper, metalised films, laminates, labelstock films

**AVANCER2** is an automatic double turret slitter with four rewinding shafts and a separate unwind station designed for increased productivity and low production downtime. The slitter is built accordingly to traditional Jurmet solid and robust construction standards. It is a combination of local engineering and high class German components. Numerous proven solutions applied in AVANCER2 slitter are designed to ease operational and maintenance high degree of flexibility.

#### AVAILABLE EQUIPMENT:

- 4 x rewinding shafts
- Separate unwind station with over / downhead run of material
- Supported shaftless unwind
- Eco-friendly built, incl. reduction of overall energy consumption
- Parent roll lifting
- Pneumatic splicing table placed over unwind station
- Web guiding system BST CLS Pro 600
- Automatic setting of rotary knives or razor blades
- Touch screen panel with memory
- Inbuilt trim vacuum system
- Automatic laser core positioning system
- Automatic pushing bar
- Automatic handling to unload finished reels
